

Vintners and Brewers Collection

Available from Remco

Breweries and wineries employ color-coding for keeping tanks clean, allergens separated, microorganisms out of certain process steps, and for identifying and segregating tools used on floors away from those tools being used on food-contact surfaces. Our collection of FDA-compliant cleaning and material handling tools come in up to 12 colors to support HACCP plans for any operation's size.

Our hygienically designed tools are easily cleanable, and are consistently used for cutting down on operating expense and waste. They are also less likely to harbor bacteria so as to not interfere with the delicate chemistry of wines or the subtle notes of a batch of beer. When tools are cleaned between wine production changeovers, they can be used in maintaining different wine flavors.

High quality materials like polypropylene, nylon, and stainless steel ensure tools' durability. Designs are ergonomically friendly, and most of our tools are lightweight. Moreover, our are easy to use, with thick molded handles that allow for easier grip.
