

Baking Industry Collection

Hygienic | Sanitary | Safe

Remco
a Vikan company

Remco provides high-quality, color-coded, FDA-compliant tools that are ideally suited for baking production facilities. In addition to hygienically-designed scoops, shovels and scrapers, Remco also features Vikan's advanced line of brushes, brooms and squeegees specifically designed to meet the dry, wet or combined cleaning requirements for typical baking operations. The tools' solid construction, with materials like polypropylene and stainless steel, also makes them a dependable part of your sanitation and material handling programs.

Hygienic Cleaning and Material Handling Tools

Available from Remco Products

The baking industry requires robust tools for shoveling, mixing, kneading, pan-layering, and scraping ingredients, as well as for clean-up of surfaces after production. Soft-bristled brushes are recommended to sweep dry flour, and scrapers are effectively used to remove sticky dough from equipment surfaces.

Our variety of sanitation tools assist in the detailed cleaning of nooks and crannies, and have the option of being fitted with telescopic handles that facilitate access to high-reaching equipment and areas.

Regardless of the baking operation's size and complexity, Vikan and Remco have the tools that come in a range of 12 distinguishable colors, making them ideal for integration with color-coded plans. Color-coding helps in preventing cross-contamination between hygienic zones, and in keeping allergens separated.
