

focus on quality

# Your Connection to Food Protection

RONCO is the first North American manufacturer of gloves and plastic products to achieve the standard of ISO 22000:2005 certification for Food Safety Management Systems

# Quality at RONCO

## Providing consistent quality products: our priority

RONCO is a customer-focused company committed to providing consistent quality products and services to respond to industry's safety product requirements.

We are dedicated to the support and realization of our quality policies, objectives and systems. In order to achieve our goals, employee training is an important part of our corporate culture.

### Quality Control

As a part of our efforts to ensure that we only deliver consistent quality products, all of our products undergo strict quality inspections, to ensure that they comply with our specifications.

- During the manufacturing process, on-line inspections are performed.
- Before products are shipped, RONCO representatives conduct a quality inspection of random samples, to ensure that products meet specifications.
- As the products are being loaded, we check to ensure that the packaging is in good condition.
- Upon arrival of the goods at our main RONCO warehouse in Canada, a further quality inspection is performed.
- For shipments made directly to our customers, our quality department coordinates (in consultation with the customer) a quality inspection by our representatives across Canada.

### HACCP

In response to increased consumer demands for food safety, Canada's governments – both federal and some provincial – have developed food safety programs incorporating internationally recognized HACCP – Hazard Analysis Critical Control Points – principles to reduce the risk of cross-contamination. RONCO features a full line of disposable and reusable gloves, as well as protective gear, many offered in a variety of colours, to assist you in achieving HACCP compliance.

### CFIA

We recognize that many of our customers in the food processing industry require "Letters of Non-Objection" from the CFIA (Canadian Food Inspection Agency). We have successfully obtained these letters for products that are used in the food processing and service industries.

### ISO

RONCO is ISO 9001:2008 certified as well as ISO 13485:2003 certified for our medical device products. As such, our entire company is committed to providing products and services that consistently satisfy and exceed the requirements and expectations of our customers.

- We have established and will continually improve the effectiveness of our quality management system, embracing the values of our business and customers.
- We strive to work with suppliers who are also ISO 9001:2008 certified.

### ISO 22000: The Ultimate Standard in Food Safety

RONCO is ISO 22000 certified as a measure of excellence.

This certification is your guarantee that RONCO products are manufactured and controlled according to international food standards. For more information on how RONCO's ISO 22000 certification can help you reduce your risks of food contamination, contact RONCO now.

RONCO is the first North American Manufacturer of Gloves and Plastic Products to be ISO 22000 certified.

# Disposable Gloves - Focus on Quality

## Quality Control

At RONCO, we believe in strict quality checks at various stages, including during production, packaging and upon arrival. We check the gloves for various properties including the following:

PROPERTIES	DESCRIPTION
Length	
Thickness	Fingertip Palm Cuff
Physical properties	Tensile strength, before and after aging Elongation, before and after aging Maximum powder level
Major visual defects	Holes in the fingers Holes between fingers Uneven colour Coagulum > 5 mm Weakness between fingers Foreign particles/dirt/stains (Non-removable) Mixed size Excess powder No bead or not completed bead
Minor visual defects	Removable dirt Slight colour variation Small stains Coagulum < 5mm Uncharacteristic odour Blister bead
Pinholes	

RONCO's AQL (Accepted Quality Level) meets or exceeds the international standards.

AQL:	
Pinholes	1.5
Major defects	2.5
Minor defects	4.0

## Colour Coding System

RONCO uses an innovative size selection colour coding system on the entire range of disposable glove dispensers to facilitate easy identification of the correct glove size. Each dispenser is colour coded on both ends as well as on the top panel making it easier to identify the right glove size.

X-Small / T petit

Small / Petit

Medium / Moyen

Large / Grand

X-Large / T grand

XX-Large / TT grand

## HACCP Compliance

RONCO offers a wide range of gloves in a variety of colours to assist in HACCP (Hazard Analysis and Critical Control Points) compliance. The different colours help you reduce the risk of cross-contamination at your workplace.

## Certifications

For all the products used in food service and food production industry, RONCO has obtained certification from CFIA (Canadian Food Inspection Agency), that make them suitable for use in food establishments.

RONCO also has obtained medical device licenses for its range of examination gloves.

- Machine washable and re-usable for more cost-efficiency

**Cut resistant,  
not cut proof**

### DEFENSOR™

Ideal glove to wear against accidental knife blade cuts. For cut protection, the glove can be worn by itself, or as a liner underneath any other type of glove.

RONCO's Defensor™ series offers cut and snag protection in a very comfortable, soft and cool glove. They are particularly useful in jobs entailing the handling of sharp blades, knives and other sharp objects. Applications include handling of metallic instruments, pans, bins and heavy equipment; and removal of institutional waste and garbage. For increased protection, pathogen preventing disposable gloves can be worn under and/or on top of the gloves. Defensor™ gloves are machine washable.

\*These gloves are not needle puncture resistant.\*

Defensor™ is a trademark of RONCO

All DEFENSOR products have been evaluated & accepted by CFIA for direct food contact

# Protective Apparel

## Protective Apparel

Choosing the proper protective garment is very important to ensuring worker safety. Determining which apparel is best suited for a job requires thorough knowledge of the duties to be performed as well as an assessment of the workplace to spot environmental hazards.

Sound knowledge of the industry standards can also contribute to the proper selection of the type of apparel needed. RONCO offers a wide variety of safety apparel to address common protection needs and requirements of various industries.

- Aprons
- Gowns
- Shoe Covers
- Bouffant Caps
- Labcoats
- Coveralls
- Masks
- Sleeves
- Beard Covers
- Safety Glasses
- Freezer Jackets
- Balaclavas

RONCO protective apparel is made from premium quality material, ensuring reliability and safety for workers who depend on them to accomplish their daily activities.

## Material Types

### Polyethylene

Most commonly used plastic; this is a single layer of polyethylene film providing good protection against fluids.

#### CPE (Cast polyethylene):

Excellent protection against liquids, oils and particulate matter

#### LDPE (Low density polyethylene):

Excellent resistance to water, moisture and most organic solvents

#### HDPE (High density polyethylene):

Excellent resistance against several acids, alkalis and solvents

#### Material properties:

Hardness: HDPE > LDPE

Strength: HDPE > LDPE

Ductility: HDPE < LDPE

Single use material

### Polypropylene

100% virgin spunbonded polypropylene; it is a single layer woven like fabric providing good protection against dry particulates and light fluids.

#### Material properties:

- Superior breathability
- Soft and light-weight

### Polyurethane

A biodegradable material that reduces environmental impact; polyurethane provides excellent resistance against chemicals, acids, fats, oils and grease. The fabric is smooth and seamless; eliminates bacterial and dirt traps.

#### Material properties:

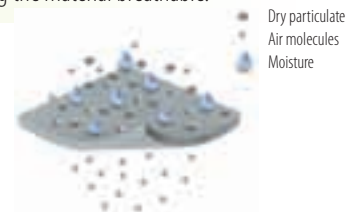

- Resistance to temperature down to -54°C / -65°F, up to 82°C / 180°F
- Excellent puncture, abrasion and tear resistance
- 100% waterproof
- Washable material; can be reused

### Microporous

Microporous material provides an effective short-term containment of contaminants in a clean environment. The construction is light in weight but provides comfort, strength and durability. It traps dirt, bacteria, spores and other airborne contaminants while allowing gases to pass through it, making the material breathable.

#### Material properties:

- Flexible and lightweight
- Impermeable
- Low linting
- Liquid barrier protection
- Dry particulate barrier protection

# Protective Apparel

## Polyethylene Aprons
